- A clinically studied, whole-joint solution that preserves joint structure, builds functional strength and supports the entire joint as a system
- Shown to preserve and improve 5 key joint structures: Cartilage, Menisci, Ligaments, Synovium, and Subchondral bone
- Kinexa has also been shown to improve knee strength and functional performance
 - 24% improvement in knee strength
 - 10% improvement in cartilage thickness
 - 4% improvement in cartilage composition
 - Greater than 26% improvement in functional mobility
 - Greater than 49% improvement in joint comfort, function and stiffness

- AprèsFlex is a low-dose, fast-acting solution for both rapid and sustained improvements in joint comfort stiffness, flexibility, and physical function
- Also helps maintain healthy joint space and preserve cartilage thickness, markers of cartilage breakdown and inflammation
 - 4 studies: fast-acting and long-term results
 - Fast acting joint comfort in just 5 days*
 - 56% reduction in WOMAC pain scores at 30 days
 - 70% reduction WOMAC pain scores at 6 months
 - Improved knee joint space and reduction of cartilage degradation
 - Preservation of cartilage health
